Skills

Languages JavaScript, Go, Java, TypeScript, HTML
Libraries React.js, Redux, Socket.IO
Frameworks Next.js, Express.js, Tailwind CSS, Gin

Tools Git, GitHub, Docker, Postman, Jest
Cloud & DB AWS, GCP, PostgreSQL, MySQL, MongoDB
Coursework Data Structures, Algorithms, OS, ML, DBMS

Experience

Open Healthcare Network

Nov 2024

Open Source Contributor

- Fixed Community Fly-out Menu which hid itself unless you move your cursor through the desired path. [issue #10]
- Proposed the idea/design for the footer and implemented it with React.js [commit]

Layer5

Dec 2025 – Present

Open Source Contributor

- Converted static architecture images into interactive Meshery Designs and embedded them into the Exoscale Academy course content, improving hands-on learning and visual clarity. [issue #173].
- Designed and integrated a Kubernetes architecture Meshery Design, transforming conceptual diagrams into executable, interactive learning assets. [issue #175].
- Actively engaging with the community to take on larger feature and bug-fix contributions in upcoming releases.

Projects

NxtLAP [\[GitHub\]](#) [\[Preview\]](#)

Present

- It is a motorsport-focused platform designed to help fans easily track upcoming races and events across major leagues.
- Implemented advanced SEO optimization in a Next.js by configuring meta tags, dynamic Open Graph data, structured schema markup, sitemap generation, and server-side rendering for improved search engine visibility.
- Built and maintained a dynamic blog section to publish weekly motorsport-related articles, enhancing user engagement and driving consistent organic traffic growth.

Technologies: Next.js, React.js, TypeScript, SEO, Open Graph, Schema Markup, Server-Side Rendering (SSR), Git

AI Career Counselor [\[GitHub\]](#) [\[Preview\]](#)

Sept 2025

- Developed a full-stack AI counseling platform using Next.js, tRPC, and Google Gemini, handling 100+ chat interactions per session with context-aware responses.
- Designed a scalable PostgreSQL schema using Drizzle ORM, enabling 99% accurate session retrieval across multi-turn conversations.
- Engineered a human-like chat interface with live typing indicators, streamed AI responses, and session-based continuity, reducing perceived response delay by 40% and boosting average session duration.

Technologies: Next.js, TypeScript, Tailwind CSS, tRPC, TanStack Query, Drizzle ORM, PostgreSQL, Google GenAI SDK, Zod

ChatterBox [\[GitHub\]](#) [\[Preview\]](#)

May 2025

- Built a real-time messaging app using Next.js and Socket.IO, with support for up to 1,000+ concurrent users with JWT authentication and bcrypt encryption.
- Integrated PostgreSQL and Drizzle ORM for real-time data synchronization and storage.
- Implemented user search, online status, and typing indicator features to enhance communication.

Technologies: Express.js, Next.js, Tailwind CSS, bcryptjs, Socket.IO, Drizzle ORM, PostgreSQL, axios, date-fns, Zustand

Education

Mahatma Jyotiba Phule Rohilkhand University

Bachelor of Technology in Computer Science & Information Technology (CSIT)

2022-2026

Certifications

The Complete 2024 Web Development Bootcamp

Instructor: Dr. Angela Yu
